

# SELECT FEEDS ON PYTHON FOR EXCEL

**For some reason it has been exceedingly difficult to find RSS feeds on particularly Python coding for Excel macros instead of using VBA code. There are plenty RSS feeds on Python, Excel, Excel VBA macros alone along with a lot of YouTube videos on Python/Excel but not feeds for Python for Excel combination. I will be adding here feeds going forward as I find in xlwings, Panda, pyxll and similar topics which are all falling under the category of Python coding for Excel automation.**
